

Let us help you save money, while you help us save the earth

By turning this

Into this!

Everyday, literally tons of trees are being chopped down and thousands of barrels of oil are used to produce new wooden and plastic pallets to fuel our ever increasing logistical needs, while we send hundreds of green and blue trash bins like the ones shown above to the landfill as they get damaged or reach their end of life cycle.

L&G RECYCLING PTE LTD

Through strategic partnerships, we are now able to salvage the bins and make them into brand new 100% recycled material plastic pallets... At a much cheaper price than a brand new one!

New 100% Recycled Pallet

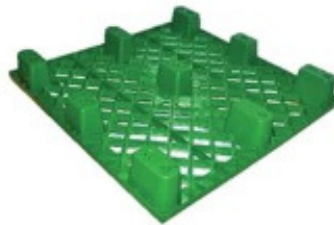

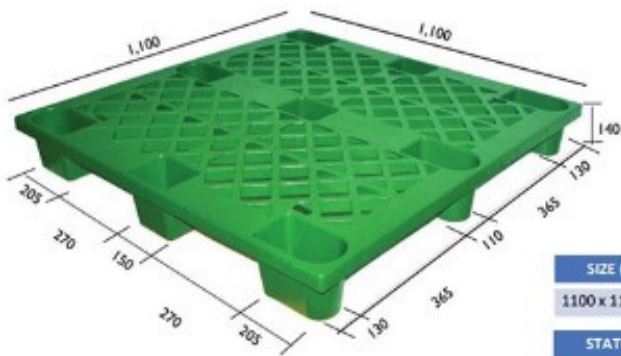

New Plastic Pallet

Wooden Pallet

- Cheap
- Lightweight
- Suitable for all industries
- Weatherproof
- Mold and Termite free
- Zero Burden to our planet
- Circular Economy
- Warranty on product

For every 3 damaged pallets purchased from us we will replace one free with your next purchase! Terms and conditions apply.
